

I live in New Jersey, and I love that we have a do not call list. I don't want anything to happen to affect it. I don't want sales calls at any time of the day. If I want or need a service, I can find out about it on my own, without having to be hassled with salespeople calling me. I am married, I have a toddler, and I have a job, three very demanding roles... I don't want to have to add "call screener" to the list of roles. Please respect families and our privacy and maintain a "do not call list".
